MOUNTAIN DELUXE

Sense of Nature

Trust in the power of nature and dedication to its beauty: With great sensitivity, our Mountain deluxe collection Sense of Nature explores the essence of nature in the Alpine region.

The result: fabrics inspired by the texture of wood, by the traces of birds in the snow, with a delicate, blurred check and a chevron. Woven from fine yarns like bouclé and chenille, embroidered with subtle tendrils or decorated with trims like the traditional costumes of the Alps. Restraint characterises the colour palette with five tableaux featuring just a few softly coordinated hues.

TONE IN TONE

Mastering the art of colour shades

Soft colours come together creating a fabric collection of subtle intensity. Textures and yarns like chenille and bouclé create a tasteful sense of vibrancy and timeless aesthetics. Plains, faux unis, and small patterns form the backdrop for two distinctive qualities: a complex check in muted colours and a stylised leaf design that fills the room with grand gestures. A calm setting, created from colour hues that nestle up against each other.

TONY

Wickerwork meets finesse

TONY QUILT is seducing with a sophisticated three-dimensional quilted structure, strongly resembling wickerwork. Its touch is appealing, its material soft and cosy. Velour and texture create a lively look of the solid colours. TONY is accompanied by a colour coordinated classical, smooth velour fabric.

VERTICALS

Same, same but different

There is one thing that all VERTICALS have in common: they love hanging around, preferably by the window. Otherwise, the decorative fabrics of this collection are as different and varied as living styles and interior design concepts.

Some of them are delicate, light and loosely woven, others are sturdy and full bodied. Some of them are shimmering, and others are printed. There are pure natural fibres, easy-to-care-for blends, classic and understated fabrics and the cool ones. On top, there are some with an extra. One of them is always the right choice.

VERTICALS FR

With that certain something

Our VERTICALS FR can do everything our VERTICALS can do. Additionally, however, they are flame-retardant. This means that they are suitable for use in projects. Other than that, the decorative fabrics in this collection are as varied and diverse as the living styles and interior design concepts. Designs, colours, weaving techniques - the variety is large.

One of them is always the right choice.

LEATHER

The real thing

Today, luxury means genuine, true, and authentic. Just like genuine leather from sustainable production. Our LEATHER collection includes leather in many forms: some natural and barely processed, some coated, sanded or brushed. Some à la nature, some dyed and pigmented in trendy colours, some velvety and soft as butter. The real thing for every ambience.

SENSE

When senses make sense

SENSE sends the most varied yarns into the game and lets them do their thing: bouclé, chenille and melange yarns, knots, and loops. The result: a selection of fabrics, frequently with a high/low effect, always with an exciting feel. Subtle colour plateaus create an atmosphere close to nature, evoking all seasons of the year, and cannot be localised. Fabrics conveying a sense of stability, assurance, and cosy living - elements for an interior design of cosy timelessness.

SUNDAY IN- & OUTDOOR

Fabrics for a Sunday mood

SUNDAY - a name promising a lot and living up to it. Indoor fabrics for outdoor use, outdoor fabrics for indoor use - the SUNDAY fabrics can do it all. Their fresh colours, the warm and soft feel and their fabulous functionality make them perfect for use in your garden, the barbecue area and the beach, but also for your living room, the bedroom or the lounge.

Their secret: solution-dyed polyolefin yarns with FibreGuard technology and excellent properties for outdoor use. The fabrics are extremely lightfast, UV-resistant, colourfast, fade-resistant, water-repellent, mould-resistant, anti-microbial, anti-bacterial and bear the OEKO-TEX® STANDARD 100 label.
