FIBREGUARD OUTDOOR IS MANUFACTURED FOR OPTIMAL FADE PROTECTION

FibreGuard Outdoor is a high performance fade resistant fabric, which has been developed for both indoor and outdoor use. It is easy to clean, water repellent, stain free, odour and mildew resistant and durable. This makes FibreGuard Outdoor a smart choice for areas exposed to the elements.

FIBREGUARD OUTDOOR WITHSTANDS OUTDOOR ELEMENTS

The unique properties of FibreGuard Outdoor fabrics ensure that stains are removable and dirt is easily cleanable resulting in your fabrics maintaining their fresh and new look.

FibreGuard Outdoor's anti-microbial and anti-bacterial attributes combat the growth of mould and mildew, which means you can rest assured knowing you and your loved ones are protected against germs and bacteria. Additionally, our fabrics will resist bad odours, commonly found in more humid environments.

With our soft touch fabric, FibreGuard Outdoor is the perfect solution for outdoor furniture - taking your indoor style outdoors.

HOW ARE FIBREGUARD OUTDOOR FABRICS FADE RESISTANT?

The fabric is constructed from solution dyed yarns, famed for their UV and weather resistant properties. In addition, our fabrics undergo rigorous laboratory testing to ensure the most robust light resistant results.

HOW ARE THESE FABRICS EASY TO CLEAN?

Our fabrics are manufactured according to stringent standards, ensuring that our FibreGuard easy clean properties are embedded in the manufacturing process – this is not an after treatment. This means that our fabrics remain easy to clean, wash after wash, stain after stain.

ARE FIBREGUARD OUTDOOR FABRICS RESISTANT TO SUNSCREEN AND SUN OILS?

Yes! Both sunscreens and oils can be easily cleaned. Please follow the steps in the FibreGuard cleaning process:

www.fibreguard.com/how-to-clean

ARE FIBREGUARD OUTDOOR FABRICS WASHABLE?

Yes, FibreGuard Outdoor fabrics are fully washable. Through constant testing, we have ensured that the clean-ability, luxurious touch, rich colour, and the dimensional stability of the fabric itself, throughout the washing process, and life of the product, are maintainable.

WHEN YOU SAY FIBREGUARD IS “ENVIRONMENTALLY FRIENDLY”, WHAT DO YOU MEAN?

All FibreGuard Outdoor fabrics are manufactured and certified under the STANDARD 100 by OEKO-TEX®, guaranteeing that they won't release any harmful finishes or chemicals into the environment and are completely safe for contact with you, your children and your pets.

Some of our beautiful collections are now Global Recycled Standard (GRS) and/or Organic Content Standard (OCS) certified.

The Global Recycled Standard is awarded to fabric containing yarn made from recycled post consumer waste such as discarded plastic bottles.

The Organic Content Standard applies to natural fibres, such as cotton, to certify that it is grown organically, without the use of harmful pesticides, and with careful water management. Please refer to fabric samples for all compositions, specifications, and certifications.

OUR FABRICS ARE EASY TO CLEAN, STAIN AFTER STAIN, WASH AFTER WASH.
THERE ARE SIMPLE STEPS TO FOLLOW WHEN CLEANING FIBREGUARD FABRICS:

1. DON'T PANIC!

For stains like mud, ketchup, lipstick or silly putty, you'll need to get a teaspoon or flat utensil. Remove all stain residue with the edge of the utensil. For other stains like pen or coffee, you won't need to do this.

2. WATER & BLOT

Apply water to the stain and blot using a white paper towel. Make sure you only blot and do not apply circular motions or rubs, because it'll just rip up your paper towel and drive the paper fibres into your fabric. Repeat the process until the stain residue is no longer visible on the paper towel.

3. WATER & CIRCLES

Apply more water to the stained area and rub with gentle, circular movements using a microfibre cloth. Use soap for stubborn stains. Any white bar of soap will do, whatever you have in the house. Now you can apply the circular rubbing motions. When using soap, use intermittently and always add water. Repeat the process until the stain is completely removed.

4. AIR DRY

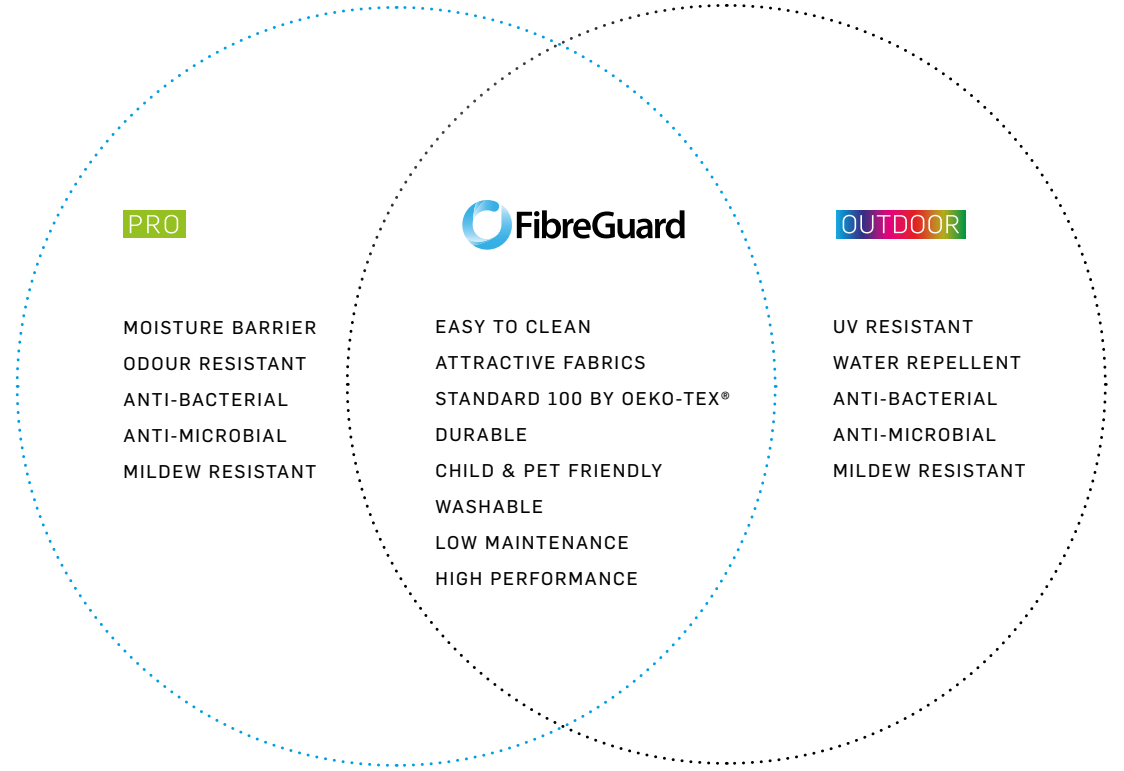

Don't use a hairdryer or apply heat to the area where the stain has been removed. Just air dry for best results.
